1. INTRODUCTION

1.1. Purpose of RFP Solicitation

This Request for Proposal (RFP) solicits proposals from qualified consulting firms to conduct a comprehensive analysis and development plan of the Community Services Facility Project in Wise County, Virginia. The consultant will create plan to construct a community services facility from the existing J. J. Kelly High School complex. The scope of work will mainly include identifying the utilization conditions of existing facilities on the former high school complex, preliminary design of the potential end product(s), construction cost estimate including renderings and documents to be used in potential funding processes, and progressing the project forward to completing final design and eventual construction management/inspection to bring the construction project to fruition. The current scope of professional services is being funded wholly by Wise County. The project will be sponsored by Wise County. The County of Wise will be the grant recipient and will administer the project.

1.2. Background

The former J. J. Kelly High School site currently sits on approximately 7.8 acres, including the building (approximately 91,700 sq ft footprint), parking and athletic facilities. Wise County has identified the need for several County departments needing new and/or expanded facilities, including the social services, health and county administrative departments. There is also the potential for moving all non-court based offices from the Wise County Courthouse to a Community Services Facility or Complex. The undertaking of a project this size will likely move in a phased approach. The current goal is to procure professional services to design the community services facility and develop a course of action to ultimate construction completion.

2. SCOPE OF WORK

2.1. Project Deliverables

The consultant will work with a cross-functional management team of representatives to collect data to define specifically:

- Creation of preliminary design, visual renderings and detailed cost estimate on construction of the community services facility.
- Development plan based around conversion/repurposing/retro-fitting of the existing facilities for most efficient and effective outputs.
- Report on conducted feasibility study to quantify needs the facility will meet with a focus on cost/benefit rational.
- Identify strategies to maximize funding opportunities to further develop the complex.

All final deliverables will be presented in a written report (including digital copy) supplemented by a management team presentation at project completion. All work papers, work products and tangible deliverables will be the property of Wise County and any applicable funding/regulatory agency as directed.
